

CELPIP Writing Practice Test 15

A free full-length CELPIP-General Writing practice test from CELPass.com: all 2 tasks in the real test order with the real timings, and an excellent sample answer for every task at the end.

Task	Topic	Timing
Task 1: Writing an Email	Feedback on New Recycling Program	Time: 27 minutes Length: 150–200 words
Task 2: Responding to Survey Questions	Noise Pollution Reduction Survey	Time: 26 minutes Length: 150–200 words

How to take this test

1. Do both tasks in one sitting: 27 minutes for Task 1, then 26 minutes for Task 2.
2. Type your answers in a plain text editor with spell check turned off, as in the real test, and aim for 150–200 words.
3. Compare with the sample answers at the end: did you cover every point, organise paragraphs and use a suitable tone?

Get your answers scored for free. On celpass.com you can take a CELPIP Writing test on the computer, as in the real exam, and get an AI score on the four CELPIP rating dimensions with every mistake marked. More free tests: celpass.com/celpip/practice-tests-pdf

Task 1: Writing an Email

Time: 27 minutes · Length: 150–200 words

Feedback on New Recycling Program

Your city recently introduced a new recycling program, and you would like to share your feedback.

Write an email to the city council. Your email should include:

- What you liked about the program.
- Any difficulties or challenges faced.
- Suggestions for improvement.

Your answer: _____ words

Task 2: Responding to Survey Questions

Time: 26 minutes · Length: 150–200 words

Noise Pollution Reduction Survey

Your city is exploring ways to reduce noise pollution, which has become a significant concern for residents. Some suggest strict regulations on vehicle noise, construction work, and loud businesses to create a quieter environment. Others propose building more noise barriers and soundproofing measures near highways and busy streets. Since both solutions require funding, the city will prioritize only one.

Which option do you prefer? Why?

- Option A: Enforce stricter regulations on noise sources (vehicles, construction, businesses).
- Option B: Build noise barriers and install soundproofing measures.

Your answer: _____ words

Sample answers

One strong answer for each task. Use them for ideas, structure and vocabulary, not to memorise: examiners notice memorised answers.

Task 1: Feedback on New Recycling Program

Excellent sample answer (written at around CLB 11–12, an estimate, not an official score)

Dear [City Council Representative],

I am writing to commend the city on implementing the new recycling program. This initiative is a positive step toward environmental sustainability. However, I have identified some areas for improvement.

Firstly, many residents have expressed confusion about proper sorting due to inconsistent labeling on bins. A public awareness campaign, including clear signage and an updated website, would be beneficial. Secondly, increasing the frequency of recycling pickups, particularly in high-density areas, would prevent overflow issues.

Thank you for your commitment to environmental preservation. I look forward to seeing these improvements.

Sincerely,

[Your Full Name]

Task 2: Noise Pollution Reduction Survey

Excellent sample answer (written at around CLB 11–12, an estimate, not an official score)

I strongly advocate for Option A, as implementing noise regulations at the source is the most effective and long-term solution for reducing urban noise pollution.

Excessive noise from traffic, construction, and commercial establishments negatively impacts mental health and sleep quality. Establishing clear regulations—such as limiting construction hours and enforcing noise limits for businesses—ensures that disturbances are minimized at their origin rather than merely masked by barriers.

While soundproofing infrastructure can mitigate noise, it does not address the root cause. By promoting responsible noise management, the city can create a more livable and harmonious urban environment.
