

CELPIP Writing Practice Test 34

A free full-length CELPIP-General Writing practice test from CELPass.com: all 2 tasks in the real test order with the real timings, and an excellent sample answer for every task at the end.

Task	Topic	Timing
Task 1: Writing an Email	Feedback on New Virtual Reality Museum Experience	Time: 27 minutes Length: 150–200 words
Task 2: Responding to Survey Questions	Renewable Energy Policies in Urban Areas	Time: 26 minutes Length: 150–200 words

How to take this test

1. Do both tasks in one sitting: 27 minutes for Task 1, then 26 minutes for Task 2.
2. Type your answers in a plain text editor with spell check turned off, as in the real test, and aim for 150–200 words.
3. Compare with the sample answers at the end: did you cover every point, organise paragraphs and use a suitable tone?

Get your answers scored for free. On celpass.com you can take a CELPIP Writing test on the computer, as in the real exam, and get an AI score on the four CELPIP rating dimensions with every mistake marked. More free tests: celpass.com/celpip/practice-tests-pdf

Task 1: Writing an Email

Time: 27 minutes · Length: 150–200 words

Feedback on New Virtual Reality Museum Experience

You recently tried a virtual reality (VR) tour at a local museum. While innovative, you encountered some issues. Write an email to the museum's program director to share your feedback and suggest improvements.

Required Points:

- Mention when you tried the VR tour and what you liked about it.
- Describe one or two specific issues you faced.
- Explain how these issues impacted your experience.
- Suggest a way to improve the VR tour.

Your answer: _____ words

Task 2: Responding to Survey Questions

Time: 26 minutes · Length: 150–200 words

Renewable Energy Policies in Urban Areas

Urban areas consume large amounts of energy and contribute to pollution. Adopting renewable energy policies can help cities become more sustainable and reduce environmental impact.

Which renewable energy policy should cities implement first?

- Option A: Require all new buildings to use solar panels for electricity.
- Option B: Offer free workshops and tours on renewable energy for interested residents.

Please choose one option and explain your preference.

Write about 150–200 words.

Your answer: _____ words

Sample answers

One strong answer for each task. Use them for ideas, structure and vocabulary, not to memorise: examiners notice memorised answers.

Task 1: Feedback on New Virtual Reality Museum Experience

Excellent sample answer (written at around CLB 11–12, an estimate, not an official score)

Dear Mr. Lee,

Last weekend's VR tour at the museum was a captivating dive into history, showcasing remarkable innovation. Regrettably, the cumbersome headsets caused discomfort, and the software crashed twice, shattering the immersive experience. These setbacks frustrated visitors and diminished the tour's potential. To elevate this offering, I recommend adopting ergonomic, lightweight headsets and rigorously testing the software for stability. I'm eager to discuss these enhancements in person to support the museum's success.

Best regards,

[Your Name]

Basic and good answers for this task: celpass.com/celpip/writing/task-1-writing-an-email/samples/feedback-on-new-virtual-reality-museum-experience

Task 2: Renewable Energy Policies in Urban Areas

Excellent sample answer (written at around CLB 11–12, an estimate, not an official score)

Mandating solar panels on all new buildings (Option A) is, in my opinion, the most impactful policy for urban sustainability. This requirement ensures consistent growth in renewable energy usage and immediately reduces a city's carbon footprint. While educational initiatives like workshops and tours (Option B) are valuable for raising awareness, their influence depends on voluntary participation and may result in slower progress. By making solar energy a standard in new construction, cities can achieve measurable environmental benefits quickly and set an example for future developments. This direct approach accelerates the transition to cleaner energy and supports long-term ecological health.
